Skills

PROGRAMMING

· **Languages**: C#, Java, JavaScript.
· **Backend**: Asp.net Core, NodeJS
· **Frontend**: React, Tailwind, CSS, HTML.
· **Databases**: SQL (MariaDB, MySQL, SQLITE), NOSQL (MongoDB).
· **Other**: Docker, RabbitMQ, Entity Framework

GENERAL

· **Other**: GIT, Powershell, Nginx.
· **Cloud**: AWS, Google Cloud.

LANGUAGES

· English – Cambridge B2
· Portuguese – Native

About

I'm a developer with over three years of experience in software projects, primarily focused on web solutions aimed at performance and scalability. Currently, I'm part of the Mobicity team, contributing to the development and maintenance of platforms for corporate mobility management, used by major companies such as **Petrobras**, **Banco do Brasil**, **Nissan**, **P&G**, **TIM**, **Copel**, **Sebrae**, and **Yara** .

I work in an agile environment (**Scrum**), always aiming for high-quality technical deliveries. My responsibilities include: building new features, system maintenance, automated testing, integration with external APIs, log analysis, hotfixes, code reviews, and technical documentation. I'm also involved in the deployment process on platforms like **AWS** and **Heroku**, ensuring system stability and continuity.

Work experience

SOFTWARE ENGINEER – NODE.JS - OCT/2024 – PRESENT

I work on the development and maintenance of solutions for corporate mobility management, serving major clients such as **Petrobras**, **Banco do Brasil**, **Nissan**, **P&G**, **TIM**, **Copel**, **Sebrae**, and **Yara**. I operate in an agile environment (**Scrum**), always focusing on best development practices.
Responsibilities:
System maintenance and bug fixing, Development of new features and automated tests, Requirements gathering and system design, Code reviews and team support, Deployments on **AWS** and **Heroku** environments, log analysis, and hotfixes, Integration with external APIs and technical documentation, **Backend** development with **NodeJs**, **Frontend** development with React and Redux

Languages: *Javascript*
Stack: *React.js | Node.js | Redis | Mocha*

Professional Highlight:

Developed the feature for integrating the client database via **Databricks**, meeting a strategic demand from **Petrobras**. I also participated in the creation of the automatic billing functionality.

AI DATA ANNOTATOR | WELOCALIZE | APR/2024 - PRESENT

Annotate data for machine learning purposes.

Essential Duties:
• Data labeling in target language(s) for machine learning on a large variety of tasks, performing research as needed.
• Determine whether language and style are appropriate to cultural and geopolitical target locale.
• Attention to detail and task instructions applying best practices consistently.
• Adhere to productivity and quality standards.
• Report bugs and issues as they occur.

Education

SYSTEMS DEVELOPMENT & ANALYSIS DEGREE
· Institution: UNISANTOS
· Concluded in: 2024

ELECTRICAL & ELECTRONICS TECHNICIAN
· Institution: SENAI ANTÔNIO SOUZA NOSCHESE
· Concluded in: 2022

ADMINISTRATION TECHNICIAN
· Institution: ETEC DONA ESCOLÁSTICA ROSA
· Concluded in: 2021

Certification

- Deployment of Cloud Services **| Google Cloud Foundations**

- Agile Development with Design Patterns | **Instituto Tecnológico de Aeronáutica (ITA)**

- B2 FIRST **| Cambridge University**

- APIs with Node.js and Express, C++, ASP.Net Core**| Alura**

-.NET, Microservices and RabbitMQ | **Alura**

- NGINX: Web server, Reverse proxy and API Gateway | **Alura**

- Secure Development **| Alura**

- LGPD **| Senai**
